

Career Development Counselling & Placement Cell of Sripat Singh College

Under the XI plan of the UGC merged scheme, the Career Development Counselling Cell at Sripat Singh College was established in 2010 to professionalize students and strengthen the link between academics and the corporate world. It plays a crucial role in informing students about the current job market, offering comprehensive support through counseling, guidance, training, and job hunting solutions. The cell also prepares students for various competitive exams (both government and private sectors) and provides training in communicative English and Hindi, soft skills, entrepreneurship, and other skill development programs. Additionally, it organizes debates, quizzes, and innovative training programs to promote a holistic approach to education.

Objectives

The cell focuses on career and employment guidance for students, addressing their diverse socio-economic challenges and geographical backgrounds while ensuring equitable access to placement opportunities. It aims to boost students' confidence through career and counseling support, addressing both academic and career-related concerns and opportunities. By providing guidance on market trends and employability, the institution helps build a solid foundation for students' socioeconomic integration. The cell helps students establish connections with the professional world, identifying career opportunities that match emerging occupational patterns. It maintains active relationships with recruiting agencies and HR personnel from reputable firms, facilitating greater onsite experience for students in their job searches. Additionally, the cell serves as a resource center offering free access to information, guidance, and internet-based global connectivity, and exchange of professional placement information. It also aims to develop industry-required skills among students and promote entrepreneurship by providing business knowledge.

Mission, Vision, and Values

Mission

The mission of the Career Development Counselling Cell is to educate, counsel, and empower Sripat Singh College students, alumni, and local residents through self-identity and career exploration.

Vision

1. Encourage students to identify and define their values, skills, interests, and passions, and use this information in making career choices.
2. Enhance students' ability to handle transitional issues encountered in the shift from college to career.
3. Develop partnerships with local, national, and global organizations, both profit and nonprofit, to create employment opportunities and training for students and alumni.

4. Nurture students' passions and talents to contribute to national service.

Core Values

- Adherence to professional standards
- Integrity
- Quality service
- Collaboration
- Innovation
