3. List of Participants:

1. Atanu Ghosh
2. Priyatosh Sarkar
3. Jesmin Sultana
4. Musiur Rahaman
5. Pubali Pande
6. Samima Aktar
7. Moumita Sarkar
8. Swaraj Mondal
9. Aparup Karmakar
10. Arit Dhar
11. Srijita Singha Roy
12. Jainab Khatun
13. Shiuli Mitra
14. Sangeeta Das
15. Sayan Saha

4. Objective:

Academic excursion plays a vital role in general education. It helps to develop practical knowledge, outlook and personality of a student. The picture of the nature that we draw in our mind is based on the textbooks, but our knowledge would be made very purposeful by practical field study through excursions which brings nature and our imaginary picture closer. A complete knowledge of nature could be revealed by two-fold aspects; firstly, by going closer to nature i.e. by making a field trip and secondly, by collecting specimen. The above task could be fulfilled by visiting a place of Phyto-geographical diversity at close proximity. Thus, taking every aspect into consideration, an educational excursion was arranged to North Bengal and Sikkim. The selection of these areas was made to study the Phyto-geographical features of these areas. The association of the different species is a characteristic feature of the areas visited. Thus, it is the study of floristic status in a city area, what efforts were extended to cope with the environmental pollution and what type of plantation was done to

stabilize the Phyto- geographical balance of that locality. Therefore, all these taken in mind and in search of wider outlook and better future correlated with the theoretical and practical knowledge, educational excursion was organized. The objectives may be precisely stated as:

- a. Study the biodiversity of plants in a different phytogeographic region.
- b. Study of sustainable agriculture technique (organic farming) at Ichhagaon.
- c. Study of Quadrate.

Few Photographs of the study visit.

Study of plant biodiversity.

Visit to Eco Nature Park

Study of organic farming at Ichhagaon
